TACTILE GROUND INDICATORS

Tactiles are used to warn visually impaired pedestrians of on coming hazards. Eg Stairways, ramps, escalators bus stops, car parks, railway platforms or any public areas. Supplied in a 300mm x 300mm mat for ease of application and also 600 x 900mm. Available in safety Yellow, other colours available upon request. Stainless Steel Tactiles are for more up market applications requiring a less obtrusive look. A disk template is available for easy installation with the Stainless Steel Discs.

* These tactiles are GST exempt

Tactiles comply to Australian Standards AS/NZS 1428.4:2002 Tested in accordance with AS/NZS 4586:1999 [App D] Slip Resistance Classification R11; Tested in Accordance with AS/NZS 1530.3:1999 Ignitability, Flame Propagation, Heat Release and Smoke Release. Approved by the Royal Blind Society and the National Federation of Blind Citizens of Australia.

New blend of PVC, widely used throughout the automotive industry, gives Tactiles a superior indoor/outdoor durability, UV stability, Slip resistance and Flame resistance. Life expectancy of 10 years or more excluding vandalism can be adhered indoor or outdoor with epoxy adhesives, or with an easy self peel adhesive backing. Available in Safety Yellow. Custom colours available - minimum order applies. Tactiles are manufactured in Australia from the highest quality materials specifically formulated to endure the harshest climatic conditions and heavy pedestrian traffic. They are suitable for railway platforms, stairways, escalators, ramps, car parks, kerb crossings, schools, bus stops, any public areas. Tactiles are available with a self peel adhesive backing superior to ordinary epoxy enabling a faster drying time. Installation is quick and easy giving a finished result that is resistant to weather, wear and tear, heat and no rebound.

Stainless Steel Tactile Discs are manufactured from 316 stainless steel for premium quality. Suitable for up market applications requiring a less obtrusive look for expensive marble or timber surfaces, and versatile enough to use on most surfaces including concrete, terrazzo, vinyl, ceramic or stone tiles. Available in 2 styles, with backing rivet or without. Both are 35mm in base diameter, 25mm in top diameter and 5mm in height. A disc template which is 300mm x 300mm and holds 36 discs to assist in installation is available.
